This page is a sample of the client's old Web site. The last page shows the new site, designed and developed by Philip Tobias. The in-between pages show some of the design mockups Tobias created.

Project and design requirements for new site:

- Design entirely new Web site for client needs
- Develop more refined color palette
- Create banner graphic with enhanced logo
- Apply Search Engine Optimization (SEO) techniques
- Implement new, easy-to-use blog section
- Automate newsletter subscriptions with signup box
- Implement new sitewide search feature
- Develop new Cascading Style Sheets (CSS) for text
- Create Web page template to ensure consistency
- Modularize design for easier site-wide updating
- Choose and stylize financial industry graphics
- Research and edit content for new Web pages
- Convert existing content cost-effectively
- Provide Quality Assurance (QA) testing of new site
- Document site changes and important files
- Train client personnel to maintain Web site
- Design similarly-branded electronic newsletter

Page Title Use Heading One

A re-engineering of your business enabling a more effervescent into a well designed and content is downright null. From your online presence mentally cause a morphing structure whose semantic

Typical Headlines Use Heading Two

To more fully clarify the current concept, a few aggregate issues will require addressing to facilitate a distributed communication venue. In integrating non-aligned structures into existing legacy systems, an even more effervescent (bubbly) gateway blueprint in a backward compatible package of tangible and immeasurable strategic value will result in right-sizing the conceptual frameworks, but only when thinking outside the box. This being said, the ownership issues inherent in dominant thematic implementations cannot be understated vis-a vis David Bowie, for instance. Another sample link.
