

AirCell is the clear leader in worldwide airborne telecommunications, with a cost-effective system for any fixed or rotary-wing aircraft. We have a solution for any aircraft, mission, altitude, or location. You now have access to telephone, e-mail, fax, weather and other in-flight information – whenever and wherever you need it. AirCell also provides you with exceptional installation flexibility. You can choose from a wide variety of antenna and handset options, including our new cordless handset. Stay in touch, in flight.

Global Satcom Systems

ST 3100

Iridium global satellite air and ground service

A competitively-priced global Satcom solution, which uses the Iridium network of 66 low-earth orbiting (LEO) satellites. Provides convenient worldwide access to phone, e-mail, or fax.

Transceiver: 4.5 lbs. (2.04 kg) • Power: 18–32 VDC, 4A maximum

ST 3120

Iridium global satellite air and ground service – for MagnaStar systems

Worldwide Iridium telecommunication for MagnaStar® C-750 and C-2000 systems. Provides two channels of voice and data communications, expanding the capacity and capability of MagnaStar systems. Air and ground service.

Transceiver: 6.0 lbs. (2.72 kg) • Power: 18–32 VDC, 4A maximum

AST 3500

Iridium global satellite air and ground service – plus airborne cellular

A revolutionary, dual-network airborne telecommunications system, which provides a unique combination of AirCell's cellular network and the Iridium satellite network. Take advantage of phone, fax, data, weather, e-mail or Internet access.

Transceiver: 5.5 lbs. (2.5 kg) • Power: 18–32 VDC, 5A maximum

Cellular USA-Only Systems

AGT.02

Cellular air and ground service

A capable, cost-effective system for nationwide air and ground communications. Provides access to phone, fax, weather, e-mail or Internet use within AirCell's continental USA cellular network.

Transceiver: 4.5 lbs. (2.0 kg) • Power: 10.5–30 VDC, 3.5A maximum

AT.02

Cellular airborne service

An inexpensive system for nationwide airborne telecommunications. Provides access to phone, fax, weather, e-mail or Internet use within AirCell's continental USA cellular network.

Transceiver: 3.2 lbs. (1.5 kg) • Power: 10.5–30 VDC, 3.1A maximum
