Overview

EDI processing lets Eclipse users trade electronically with customers and vendors, at the press of a key. Quickly receive new sales orders from your EDI-capable customers, then invoice them, electronically. No labor, no delay. Eclipse EDI even takes orders for you when no one is around. The EDI Activity Log shows you the status of all connection attempts, connections, and allied transaction information. You know at a glance whether an important document was sent or

received successfully. Get faster service and fewer errors from vendors by sending Purchase Orders electronically. Vendor Managed Inventory (VMI) ensures optimum stock levels and prices. Don't be left behind when your trading partners are the next to require cost-effective Electronic Data Interchange. Use Eclipse EDI today. Eclipse EDI gives you the tools for fast, convenient electronic commerce.

Benefits

- Save money – Save Purchase Order labor, plus finally take advantage of your vendors' EDI incentives and discounts.
- Accuracy and automation – Sales orders are entered correctly, the first time. Eliminate delays and mistakes re-keying orders.
- Save time – Purchase Orders enter your system automatically, for immediate action. Quicker service means happier customers.
- Unattended order taking – You can now receive sales orders around the clock. With EDI, you're always open for business.

Highlights

■ Seamless Integration . . . *Eclipse EDI works with all your ordering modules*

EDI is fully integrated with your Eclipse system and can be accessed from any terminal. New capabilities, but with the same familiar system. When you are in Eclipse's purchasing module and have completed a Purchase Order, you are only a keystroke away from transmitting the Purchase Order to the vendor. Eclipse will even notify you when the transmission has been successfully received. Network Call Scheduling lets you use your EDI mailbox at your convenience.

■ **Exceptionally Easy to Use . . . *Electronic trading is just a keystroke away***

Because Eclipse EDI extends your existing system, employees appreciate its ease of use. You'll appreciate EDI's labor reductions. Replace a pile of paperwork with a keystroke. Cut errors, too. With Eclipse EDI, accurate orders are entered unattended. What could be easier?

■ **Automatic Error Detection & Recovery . . . *Eclipse keeps your transactions on track***

You can depend on automatically verified transaction accuracy, including posted acknowledgments from all your trading partners. Eclipse EDI's built-in messaging system also alerts you to any potential problems – before they occur, so that you have ample time to respond.
