

Why Eclipse for *your* 21st Century Distribution Management System?

The answers are as varied as today's wholesale distribution business itself. See and hear the answers Eclipse customers give you.

Leading-edge North American distributors tell you why they chose Eclipse for their businesses, and reveal real-world experiences with Eclipse.

Reasons to choose Eclipse include its strong leadership in new technology and e-commerce, Eclipse's 21st century communications solutions, improved efficiency and productivity, audit logs and activity tracking, reduced inventory levels, plus increased sales and profitability.

"We were picking one half the line items with 26 people," says one Eclipse customer, "and now we have doubled the line items and we are down to 9 people who actually do the picking, receiving, put away, and shipping of the products."

Another Eclipse customer states, *"Since we moved to Eclipse we have been able to lower our inventory 10% and our sales have increased 40%."*
