

First European ATR Approved MRO Partner

Approved and Dependable MRO Services

Rheinland Air Service (RAS) is the first European MRO company to earn official ATR network partner approval.

RAS regularly supports over 75 ATR 42/72 aircraft. That gives us the broad experience to be the complete and trusted solution for all your MRO needs.

Now doubling in size, our expanded headquarters will fit six more ATR 42/72. Our professional and well-experienced technicians and huge on-site parts warehouse help ensure fast turnarounds. RAS even buys and dismantles ATR aircraft to repair, recertify and stock hard-to-find spare parts.

You can depend on RAS for everything from A checks to 36,000 cycle checks. We offer expert base and line maintenance, avionics installations and MPC modifications, along with structural, composite and component repairs.

Respected across Europe, and now with a facility in Southern Africa, RAS is one of only three companies in the world to earn a coveted ATR certification for flight controls.

Find out why airlines like yours depend on RAS. We're ATR approved, flexible and efficient, and fast customized service is our pledge to you.

Visit www.ras.de/atr to browse our ATR services and spare parts inventory.
