

Step 1: Take This Opportunity to Get Reliable, Worldwide Satcom for a Fraction of What You've Been Paying.

And talk free
for six months...

AirCell®

When you're in flight, you can't afford to be out of touch. But you don't want to pay \$4, \$6 or \$9 a minute to make a phone call from your aircraft.

With AirCell, you don't have to. It's easy to add one of our Satcom systems during routine maintenance or when complying with FAA mandates such as DRVSM or TAWS. *Save as much as \$8 per minute on every call you make!*

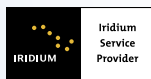

And when you order the **AirCell ST 3120 Transceiver for MagnaStar®** or **ST 3100 System** by June 30, 2004, you get a bonus of 6 months of unlimited airtime – Free.

Step 2: Choose Your Satcom Solution

Choose the ST 3100 System (ST 3100, Iridium antenna, cordless handset and extra handset of your choice, qualifying Silver Service rate plan) for a compact, yet complete Satcom solution. It's ideal for fixed-wing or helicopter operators looking for a cost-effective, reliable communications tool.

Or choose our new ST 3120 Transceiver for MagnaStar systems. Compact and easy to install, the ST 3120 expands the capability of a MagnaStar phone – giving you two new channels of global satellite voice and data telecommunications worldwide.

Regardless of which AirCell Satcom solution you choose, you get the famous AirCell benefits.

AirCell Benefits Summary
